If you are ready for a change in your life, we can help.

With many years of combined experience in the treatment of addiction and co-occurring disorders, our highly trained and experienced team of professionals are dedicated to excellence.

Our team consists of licensed professional staff who utilize the latest evidence-based practices in chemical dependency.

Recovery Housing is available onsite, with separate gender facilities and meals are also provided.

Transportation to and from the facility can also be arranged.

The ARC provides a supportive beginning for anyone making lifestyle changes. Addiction destroys families generation after generation.

We offer an opportunity to reclaim your life and your family.

We do require regular attendance and participation in group, family, and individual treatment services. Our approach includes the latest evidenced-based practices in the Therapeutic Community milieu.

Housing is available to remove each client from their environment in order to assist in breaking free from addictive behaviors and learning about those behaviors that led you to a lifestyle of addiction.
